EDUCATION

B.Tech, Computer Science and Engineering , Roorkee Institute of Technology	2027
CGPA: 8.16	
Class XII (CBSE) , Kendriya Vidyalaya Kashipur	2023
86.8%	
Class X (CBSE) , Kendriya Vidyalaya Kashipur	2021
98.4%	

SKILLS

Languages: C, C++, Java, Python, JavaScript, TypeScript, SQL
Frontend: React, Vite, HTML5, CSS3, Tailwind CSS, Redux Toolkit, Next.js, shaden/ui
Backend: Node.js, Express.js, REST APIs, JWT Authentication
Databases: MongoDB, Mongoose, MySQL
Tools & Concepts: Git, GitHub, Postman, VS Code, DSA, OOP, DBMS, RBAC, CORS, Cloudinary, Axios

INTERNSHIP

Web Development Internship Live Demo | GitHub

React, Tailwind CSS, Framer Motion, Context API, Recharts

- Developed responsive portfolio and CSK Fan Club website with dark mode, schedules, stats, and voting features.
- Implemented reusable React components and deployed projects using Netlify.

PROJECTS

Full-Stack MERN E-Commerce Platform Live Demo | GitHub

React, Vite, Node.js, Express.js, MongoDB, Tailwind CSS

- Built a scalable full-stack MERN e-commerce platform with authentication, cart, checkout, and order management features.
- Developed RESTful APIs for products, users, cart, orders, reviews, and search functionality using Express.js.
- Implemented JWT-based authentication, protected routes, and admin authorization for secure access control.
- Designed MongoDB schemas and modular backend architecture using controllers, middleware, and Mongoose models.
- Built admin dashboard features for inventory management, product control, and order tracking.
- Integrated responsive UI with React, Tailwind CSS, and efficient state management for smooth user experience.

Docify – Full-Stack Healthcare App Live Demo | GitHub

React, Vite, Node.js, Express.js, MongoDB, Tailwind CSS, Cloudinary, Axios

- Built full-stack healthcare platform with separate admin and patient React/Vite frontends.
- Developed REST APIs for authentication, doctors, appointments, scheduling, and patients.
- Implemented JWT authentication, protected routes, React Context, and localStorage sessions.
- Designed modular backend using MongoDB schemas, controllers, middleware, and Mongoose.
- Built admin dashboard with doctor management, appointments, and RBAC functionality.
- Developed doctor search, booking, profile, tracking, and patient management features.
- Integrated Cloudinary uploads and Axios-based frontend-backend API communication.

Portfolio Website Live Demo | GitHub

React, Tailwind CSS, Framer Motion

- Built animated responsive portfolio with smooth UI, reusable components, and EmailJS contact integration.

CERTIFICATIONS

- Java, Python, and C Programming – IIT Bombay
- MongoDB Certification – MongoDB University

ACHIEVEMENTS

- Winner – HackSprint (GDG OnCampus RIT): Built **Civix**, a civic-tech solution addressing real-world public challenges.
- Winner – RIT-A-THON: Secured 1st position in a 24-hour coding marathon focused on innovation and teamwork.
- Finalist – GFG × RIT Hackathon (Top 5) for developing the Civix civic-tech platform.
- 2nd Position – CodeSphere Hackathon for integrating Gemini Vision API chatbot into Civix.
- 1st Position – Blind Coding Challenge organized by Utthan Technical Club, RIT Roorkee.

Place: Roorkee
